

Performance Testing :

Testing Authorized User:

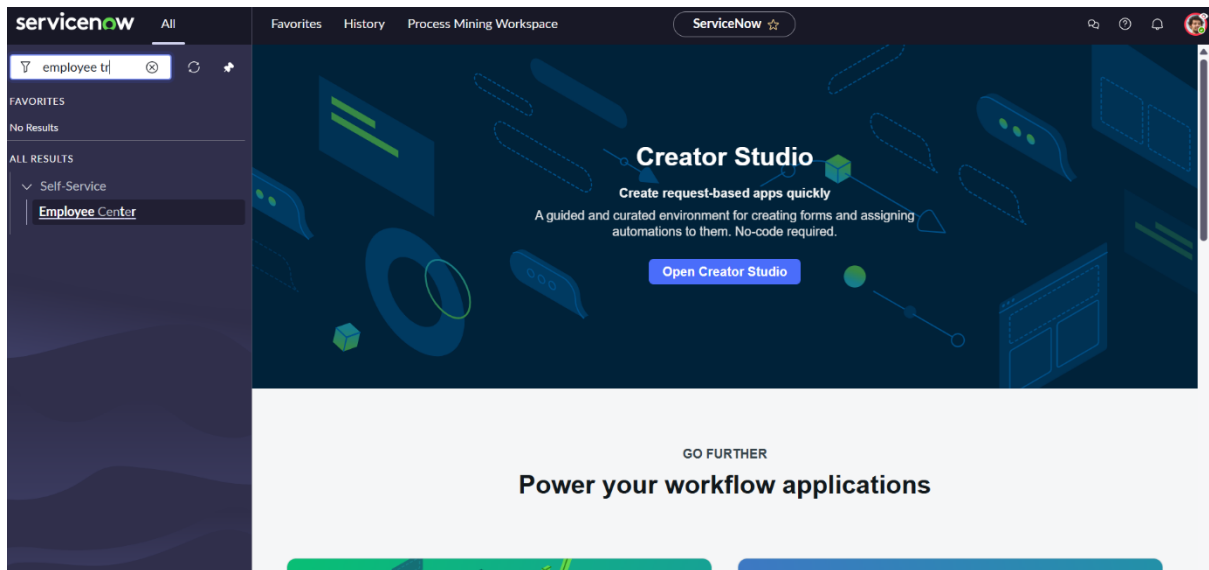

1. Navigate to user menu.
2. Click on impersonate user.
3. Search for backup user.
4. Select backup user and click impersonate.
5. In the application navigator search “Employee Training Records”.

Completion Date	Employee	Status	Training Name
(empty)	eva.miller@example.com	In Progress	Compliance Training
(empty)	bob.johnson@example.com	In Progress	Cybersecurity Awareness
(empty)	henry.taylor@example.com	Not Started	Customer Service
(empty)	frank.wilson@example.com	Completed	Advanced ITSM
(empty)	henry.taylor@example.com	In Progress	Advanced ITSM
(empty)	henry.taylor@example.com	Not Started	Project Management
(empty)	jack.thomas@example.com	Completed	Customer Service
(empty)	eva.miller@example.com	In Progress	Incident Handling
(empty)	eva.miller@example.com	Not Started	Customer Service
(empty)	frank.wilson@example.com	In Progress	Time Management
(empty)	frank.wilson@example.com	In Progress	Project Management
(empty)	frank.wilson@example.com	Completed	Compliance Training
(empty)	irene.anderson@example.com	Not Started	Compliance Training
(empty)	frank.wilson@example.com	Completed	Communication Skills
(empty)	jack.thomas@example.com	Completed	Communication Skills
(empty)	henry.taylor@example.com	Completed	Communication Skills
(empty)	frank.wilson@example.com	Not Started	Project Management

6. The manager is able to access the application , modules as well as the data in that table.
7. Its working fine.
8. You can also see the new button in the form that means the manager is able to edit and read the fields.

Testing Unauthorized User:

1. Impersonate Abel tuter.

2. We can clearly see that the user is unable to access the applications and the modules.

Conclusion :

Hence the Authorized User is able to access the Employee Training Records. And the Unauthorized user is unable to access the Employee Training Records.
